

## Neutralising rinse for automated washing process of animal cages Liquid concentrate

### Fields of application

Automated cleaning of animal cages, bottles and accessories as well as cage, storage and transport racks in specially designed washers.

Available in 10 and 20 L

### Performance Spectrum

- Acidic neutralising rinse aid for neutralising alkali residues and assists with drying.
- Made with natural occurring acids.
- Compatible with Stainless Steel, Polycarbonate, Polyetherimide, Polysulfone and Polyphenylsulfone.

### Special Properties

- Prevents cracks and crazing during autoclaving.
- Free of phosphates.
- Excellent material compatibility.

### Application and dosage

Allentown Acid Rinse is used within industrial cage washers for the effective neutralisation of animal caging systems and associated components. Dose rates are determined by the cycle configuration, water conditions and detergent in use, and is recommended for use between 0.05-0.2 % (0.5-2 mL/L).

Compatible for all types of polysulfone and polycarbonate caging, enrichment and effective at preventing crazing during autoclaving.

Suitable for use with automatic dosing systems and bulk delivery systems.

Optimal water conditions for use with the detergent should be between  $\text{CaCO}_3 > 50-100$  ppm.

### General instructions on use

- Acidic, neutralises alkaline residues.
- Do not mix with other products.
- Purge dosing system including suction hose with water before changing product.
- The instructions given by the manufacturer of the washers are to be observed.
- Please observe the recommendations on cage washing given by the manufacturer of the items to be washed and the recommendations of the working group for cage processing (AK KAB) in the current issue of the AK KAB brochure "Cage Processing in Animal Facilities properly done".
- For professional use only.

Dosage Guide		
Neutralising rinse of caging	0.05-0.2 %	0.5-2 mL per litre of water

### Technical data

pH-range: 3-4

### Ingredients

Ingredients are compliant to the provisions of Regulation (EC) No 648/2004 on detergents:  
1-10% Citric Acid.

### Storage information

Always store at a temperature ranging between 0 and 30 °C.

Usable for 4 years from manufacture date, when stored as recommended. Please see container for dedicated batch details.

### Hazard warnings and safety advice

The concentrate is classified and labelled according to the CLP Regulation (EC) No 1272/2008.

This mixture is non-hazardous.

### Precautionary Statements:

- Do not ingest product.
- It is recommend to practice good hygiene measures when using this product, wash hands after use.

For further safety information see Safety data sheets.
